

myCSG © 2026 | Area: ADaM | Concept: ADEG - Full ADEG - ECG Analysis Dataset | Lesson: ADaM_ADEG_L1101 : ADEG dataset in a parallel arm study |

Lesson Description	Site	SAS Video	SAS Program	R Program
			• Complete program for ADEG of a parallel arm study ◦ Includes creation paramcd, paramn, param derivation ◦ Includes analysis visit windowing - AVISITN, AVISIT, AWLO, AWHI, AWTARGET, AWTDIFF, AWU ◦ Includes baseline flagging and dependent variables creation - ABLFL, BASE, CHG, PCHG ◦ Includes creation of category variables - AVALCAT1, AVALCA1N, BASECAT1, BASECA1N, CHGCAT1, CHGCAT1N ◦ Includes creation of an analysis flag- ANL01FL - to select one record per analysis visit/parameter/subject ◦ Includes creation of ANL02FL - to identify postbaseline records ◦ Includes creation of two shift variables - SHIFT1, SHIFT2
