ROWORDER ▴	VARIABLE_NAME ▴	VARIABLE_LABEL ▴	DERIVATION ▴
001	TR01SDT	Date of First Exposure in Period 01	Using EX dataset - get TR01SDT as the numeric(datepart(EXSTDTC)) of the earliest record of a subject where VISITNUM in (201 202 203 204) . Details: Subset the records from EX with the above given condition and sort by USUBJID and EXSTDTC and pick the earliest non-missing date.
002	TR02SDT	Date of First Exposure in Period 02	Using EX dataset - get TR02SDT as the numeric(datepart(EXSTDTC)) of the earliest record of a subject where VISITNUM in (205 206 207 208) . Details: Subset the records from EX with the above given condition and sort by USUBJID and EXSTDTC and pick the earliest non-missing date.
003	TR01EDT	Date of Last Exposure in Period 01	Using EX dataset - get TR01EDT as the numeric(datepart(EXSTDTC)) of the latest record of a subject where VISITNUM in (201 202 203 204). Details: Subset the records from EX with the above given condition and sort by USUBJID and EXENDTC and pick the latest non-missing date. Also note that this is the simplest case of derivation of TR01EDT - there can be multiple conditions to check for depending on how to handle ongoing subjects - which will be protocol specific.
004	TR02EDT	Date of Last Exposure in Period 02	Using EX dataset - get TR02EDT as the numeric(datepart(EXSTDTC)) of the latest record of a subject where VISITNUM in (205 206 207 208). Details: Subset the records from EX with the above given condition and sort by USUBJID and EXENDTC and pick the latest non-missing date. Also note that this is the simplest case of derivation of TR02EDT - there can be multiple conditions to check for depending on how to handle ongoing subjects - which will be protocol specific.
005	TRTSDT	Date of First Exposure to Treatment	Using TR01SDT and TR02SDT - get TRTSDT as the earlier of the two dates (TR01SDT, TR02SDT).
006	TRTEDT	Date of Last	Using TR01EDT and
