

- In SDTM datasets, dates are present in character variables in ISO 8601 format
- ISO 8601 format has a structure of YYYY-MM-DDTHH:MM:SS
- For analysis purposes, we may need the date, time or date and time variables in numeric format
- In ADaM datasets, we create separate numeric variables to store date, time, datetime values
- In this lesson, we will see how to convert character date values to numeric format
