|------------|-----------------|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 001        | ADT             | Analysis Date                | Extract the date portion from VSDTC and convert it to numeric value                                                                                                                                       |
| 002        | PARAM           | Parameter                    | Set to propcase(VSPOS)  VSTEST  " ("  VSSTRESU  ")                                                                                                                                                        |
| 003        | PARAMCD         | Parameter Code               | If VSPOS="SITTING" and VSTESTCD="SYSBP" then set to "STSBP", Else if VSPOS="SITTING" and vSTESTCD="DIABP" then set to "STDBP"                                                                             |
| 004        | PARAMN          | Parameter (N)                | If PARAMCD="STSBP" then set to 1, Else if PARAMCD="STDBP" then set to 2.                                                                                                                                  |
| 005        | AVAL            | Analysis Value               | Set to VSSTRESN                                                                                                                                                                                           |
| 006        | AVISIT          | Analysis Visit               | A. For the souce records: If VS.VISIT="SCREEN" then set to "Screening", Else set to propcase(VS.VISIT) B. For the record with ABLFL="Y" set to "Baseline"                                                 |
| 007        | AVISITN         | Analysis Visit (N)           | A. For the souce records: If VS.VISIT="SCREEN" then set to -1, Else Set to VS.VISITNUM B. For the record with ABLFL="Y" set to 0                                                                          |
| 008        | ABLFL           | Baseline Record Flag         | Set to "Y" on the record with lowest non-missing result on or before treatment start date for each parameter within a subject If there exists multiple records with lowest value, pick the latest record. |
| 009        | BASE            | Baseline Value               | Populate the AVAL from the record where ABLFL="Y" across all records of parmeter within a subject                                                                                                         |
| 010        | CHG             | Change from Baseline         | Set to AVAL-BASE on the records where ADT>TRTSDT>.                                                                                                                                                        |
| 011        | PCHG            | Percent Change from Baseline | Set to CHG/BASE*100 on records where ADT>TRTSDT>. and BASE is not in (0,.)                                                                                                                                |
| 012        | BASETYPE        | Baseline Type                | Set to "MINIMUM"                                                                                                                                                                                          |
