010	AESEV	Severity/Intensity	Equals to the value from raw.adverse.AESEV, after converting to standard controlled terminology
011	AESER	Serious Event	Equals to the value form raw.adverse.AESER, after converting to standard controlled terminology
012	AEACN	Action Taken with Study Treatment	Equals to the value from raw.adverse.AEACN, after converting to standard controlled terminology
013	AEACNOTH	Other Action Taken	Equals to the value from raw.adverse.AEACNOTH
014	AEREL	Causality	Equals to the value from raw.adverse.AEREL, after converting to standard controlled terminology
015	AEOUT	Outcome of Adverse Event	Equals to the value form raw.adverse.AEOUT, after converting to standard controlled terminology
016	AESCONG	Congenital Anomaly or Birth Defect	Equals to the value from raw..adverse.SCONG, after converting to standard controlled terminology
017	AESDISAB	Persist or Signif Disability/Incapacity	Equals to the value from raw..adverse.SDISAB, after converting to standard controlled terminology
018	AESDTH	Results in Death	Equals to the value from raw..adverse.SDEATH, after converting to standard controlled terminology
019	AESHOSP	Requires or Prolongs Hospitalization	Equals to the value from raw..adverse.SHOSP, after converting to standard controlled

020	AESLIFE	Is Life Threatening	Equals to the value from raw.adverse.SLIFE, after converting to standard controlled terminology
021	AESMIE	Other Medically Important Serious Event	Equals to the value from raw.adverse.SMIE, after converting to standard controlled terminology
022	EPOCH	Epoch	Derive by comparing sdtm.ae.AESTDTC with the sdtm.se.SEESTDTC and sdtm.se.SEENDTC of each element of a subject and assign the epoch based on the sdtm.se.EPOCH of the element in which each event start date falls. 
023	AESTDTC	Start Date/Time of Adverse Event	Equals to the value from raw.adverse.AESTDT_RAW, after converting to ISO 8601 format
024	AEENDTC	End Date/Time of Adverse Event	Equals to the value from raw.adverse.AEENDT_RAW, after converting to ISO 8601 format
025	AESTDY	Study Day of Start of Adverse Event	If the event date is on or after reference start date then sdtm.ae.AESTDTC - sdtm.dm.RFSTDTC +1. Else if date is before reference start date then assign as sdtm.ae.AESTDTC - sdtm.dm.RFSTDTC. 

USBJID	Date	RFSTDTC	Study day
			Date-RFSTDTC
			Date-RFSTDTC
			Date-RFSTDTC
			Date-RFSTDTC

026	AEENDY	Study Day of End of Adverse Event	If the event date is on or after reference start date then sdtm.ae.AEENDTC - sdtm.dm.RFSTDTC +1. Else if date is before reference start date then assign as sdtm.ae.AEENDTC-sdtm.dm.RFSTDTC.
027	PREFDOSE	Prior to First Dose?	Equals to the value from raw.adverse.PREFDOSE
028	AETRTEM	Treatment Emergent Flag	Derive by using the information present in raw.adverse.PREFDOSE and comparing sdtm.ae.AESTDTC with sdtm.dm.RFSTDTC and sdtm.dm.RFXENDTC. If raw.adverse.PREFDOSE="Y" then set to "N". Else if sdtm.ae.AESTDTC is on or after sdtm.dm.RFSTDTC but before (sdtm.dm.RFXENDTC+15) then set to "Y". Else set to "N".
