Roworder	variable_name	variable_label	derivation
001	STUDYID	Study Identifier	Equals to the value from raw.xxx.STUDY, where xxx corresponds to the raw dataset from which a row is created in sdm.ds
002	DOMAIN	Domain Abbreviation	Assign as "DS"
003	USUBJID	Unique Subject Identifier	Derive by concatenating raw.xxx.STUDY and raw.xxx.PT variable values, separated with a hyphen in between. 'xxx' corresponds to the raw dataset from which a row is created in sdm.ds
004	DSSEQ	Sequence Number	Sort the dataset by USUBJID, DSSTDTC and assign 1 on the first record for each subject, and increment by 1 on each subsequent record for subject.
005	DSREFID	Reference ID	Equals to the value from raw.enrlment.RANDNO, only on the record where sdm.ds.DSDECOD="RANDOMIZED".
006	DSTERM	Reported Term for the Disposition Event	See DSSTDTC variable derivation for details. Part A) Protocol Milestones 1) Informed consent: Assign as "INFORMED CONSENT OBTAINED" 2) Enrolled: Assign as "ENROLLED TO STUDY" 3) Randomization: Assign as "RANDOMIZED" Part B) Disposition Events 1) End of investigation product: Equals to the value from raw.eoip.EOTERM 2) End of study: Equals to the value from raw.eos.EOTERM
007	DSDECOD	Standardized Disposition Term	See DSSTDTC variable derivation for details. Part A) Protocol Milestones 1) Informed consent: Assign as "INFORMED CONSENT OBTAINED" 2) Enrolled: Assign as "ENROLLED TO STUDY" 3) Randomization: Assign as "RANDOMIZED"
			Part B) Disposition Events 1) End of investigation product: Equals to the value from raw.eoip.EOTERM after converting to standard controlled terminology 2) End of study: Equals to the value from raw.eos.EOTERM after converting to standard controlled terminology
008	DSCAT	Category for Disposition Event	Assign as "PROTOCOL MILESTONE" for the protocol milestone records, and assign as "DISPOSITION EVENT" for the disposition event related records
009	DSSCAT	Subcategory for Disposition Event	Assign as 'END OF STUDY' for the disposition event record created from raw.eos. Assign as 'END OF INVESTIGATIONAL PRODUCT' for the disposition event record created from raw.eoip.
010	DSSTDTC	Start Date/Time of Disposition Event	Create a record only when the corresponding input raw date variable value is not null. Part A) Protocol Milestones 1) Informed consent: Equals to the value from raw.enrlment.ICDT_RAW after converting to ISO 8601 format. 2) Enrolled: Equals to the value from raw.enrlment.ENRLDT_RAW after converting to ISO 8601 format. 3) Randomization: Equals to the value from raw.enrlment.RANDDT_RAW after converting to ISO 8601 format. Part B) Disposition Events 1) End of investigation product: Equals to the value from raw.eoip.EOSTDT_RAW after converting to ISO 8601 format. 2) End of study: Equals to the value from raw.eos.EOSTDT_RAW after converting to ISO 8601 format
011	DSSTDY	Study Day of Start of Disposition Event	1) Fetch sdm.DM.RFSTDTC for each subject and create a temporary variable named RFSTDTC by extracting the date portion and converting it to numeric value. 2) Extract the date portion from sdm.ds.DSSTDTC and create a temporary variable named DSSTDTC by converting it to numeric value. 3)Derive DSSTDY only when both DSSTDTC and RFSTDTC are not null. If DSSTDTC>=RFSTDTC then DSSTDY=(DSSTDTC-RFSTDTC)+1. Else if DSSTDTC
012	PROTVERS	Enrolled Protocol Version	Equals to the value from raw.enrlment.PRTVERS, only on the record where sdm.ds.DSDECOD="INFORMED CONSENT OBTAINED".
013	CNSTVERS	Enrolled Consent Version	Equals to the value from raw.enrlment.ICVERS, only on the record where sdm.ds.DSDECOD="INFORMED CONSENT OBTAINED".
