ROWORDER	SUPP	VARIABLE_NAME	VARIABLE_LABEL	TYPE	GENERAL_COMMENT	FORM_PCON																																			
001		STUDYID	Study Identifier	Char	Populate as "MYCSG"																																				
002		DOMAIN	Domain Abbreviation	Char	Populate as "PC"																																				
003		USUBJID	Unique Subject Identifier	Char	Populate by concatenating "MYCSG-" as a prefix to SUBJECT variable.																																				
004		PCSEQ	Sequence Number	Num	Sort the records by USUBJID, PCTESTCD, PCDTC and set to 1 on the first record for each subject, and increment by 1 for each subsequent record within the subject. <table><tr><th>ROWID</th><th>DATA1</th><th>DATA2</th><th>DATA3</th><th>DATA4</th></tr><tr><td>0001</td><td></td><td></td><td>1</td><td></td></tr><tr><td>0002</td><td></td><td></td><td>2</td><td></td></tr><tr><td>0003</td><td></td><td></td><td>3</td><td></td></tr><tr><td>0004</td><td></td><td></td><td>4</td><td></td></tr><tr><td>0005</td><td></td><td></td><td>5</td><td></td></tr><tr><td>0006</td><td></td><td></td><td>6</td><td></td></tr></table>	ROWID	DATA1	DATA2	DATA3	DATA4	0001			1		0002			2		0003			3		0004			4		0005			5		0006			6		
ROWID	DATA1	DATA2	DATA3	DATA4

0002			2																																						
0003			3																																						
0004			4																																						
0005			5																																						
0006			6																																						
005		PCGRPID	Group ID	Char		Populate with the value from GRPID variable.																																			
006		PCTESTCD	Pharmacokinetic Test Short Name	Char		Populate as "DRUGA"																																			
007		PCTEST	Pharmacokinetic Test Name	Char		Populate as "Drug A"																																			
008		PCORRES	Result or Finding in Original Units	Char		Populate with the value from RESULT variable.																																			
© 2014–2026 Copyright: www.mycsg.in																																									
						Populate with the value from UNIT variable.																																			
010		PCSTRESC	Character Result/Finding in Std Format	Char		Populate with the value from RESULT variable.																																			
011		PCSTRESN	Numeric Result/Finding in Standard Units	Num	Populate with the numeric value of PCSTRESC where applicable.																																				
012		PCSTRESU	Standard Units	Char		Populate with the value from UNIT variable.																																			
013		PCSPEC	Specimen Material Type	Char		Populate with the value from SPEC variable.																																			
014		PCLOQ	Lower Limit of Quantitation	Num		Populate as "0.10".																																			
015		PCULOQ	Upper Limit of Quantitation	Num		Populate as "20"																																			
016		VISITNUM	Visit Number	Num		Populate with the value from FOLDERSEQ variable.																																			
017		VISIT	Visit Name	Char		Populate with the value from FOLDERNAME variable - use only the first word before hyphen.																																			
© 2014–2026 Copyright: www.mycsg.in																																									
			Specimen Collection			PCDTC_RAW and PCTIM, after converting to ISO 8601 format.																																			
019		PCTPT	Planned Time Point Name	Char		Populate with the value from PCTPT variable.																																			
020		PCTPTNUM	Planned Time Point Number	Num		Set to 0 when PCTPT="PREDOSE". Set to 1.5 when PCTPT="1H30MIN". Set to 6 when PCTPT="6H". Set to 24 when PCTPT="24H".																																			
021		PCELTMT	Planned Elapsed Time from Time Point Ref	Char		Set to "-PT15M" when PCTPT="PREDOSE". Set to "PT1H30M" when PCTPT="1H30MIN". Set to "PT6H" when PCTPT="6H". Set to "PT24H" when PCTPT="24H".																																			
022		PCTPTREF	Time Point Reference	Char		Concatenate the GRPID variable value with " Dose" as a suffix.																																			
023		PCRFDTDC	Date/Time of Reference Point	Char		Populate with the value from DOSING_TIME variable.
