ROWORDER	SUPP	VARIABLE_NAME	VARIABLE_LABEL	TYPE	GENERAL_COMMENT	FORM_PPARAM																																																																		
001		STUDYID	Study Identifier	Char	Populate as "MYCSG"																																																																			
002		DOMAIN	Domain Abbreviation	Char	Populate as "PP"																																																																			
003		USUBJID	Unique Subject Identifier	Char	Populate by concatenating "MYCSG-" to the value of subject as a prefix.																																																																			
004		PPSEQ	Sequence Number	Num	Sort the records by USUBJID, PPCAT, PPTESTCD, PPGRPID and set to 1 on the first record for each subject, and increment by 1 for each subsequent record within the subject. <table><thead><tr><th>PPSEQ</th><th>DATA</th><th>DOSE</th><th>DOSE</th><th>DOSE</th><th>DOSE</th></tr></thead><tbody><tr><td>001</td><td></td><td></td><td></td><td></td><td>1</td></tr><tr><td>001</td><td></td><td></td><td></td><td></td><td>2</td></tr><tr><td>001</td><td></td><td></td><td></td><td></td><td>3</td></tr><tr><td>001</td><td></td><td></td><td></td><td></td><td>4</td></tr><tr><td>001</td><td></td><td></td><td></td><td></td><td>5</td></tr><tr><td>001</td><td></td><td></td><td></td><td></td><td>6</td></tr><tr><td>001</td><td></td><td></td><td></td><td></td><td>7</td></tr><tr><td>001</td><td></td><td></td><td></td><td></td><td>8</td></tr><tr><td>001</td><td></td><td></td><td></td><td></td><td>9</td></tr><tr><td>001</td><td></td><td></td><td></td><td></td><td>10</td></tr></tbody></table>	PPSEQ	DATA	DOSE	DOSE	DOSE	DOSE	001					1	001					2	001					3	001					4	001					5	001					6	001					7	001					8	001					9	001					10	
PPSEQ	DATA	DOSE	DOSE	DOSE	DOSE																																																																			
001					1																																																																			
001					2																																																																			
001					3																																																																			
001					4																																																																			
001					5																																																																			
001					6																																																																			
001					7																																																																			
001					8																																																																			
001					9																																																																			
001					10																																																																			
005		PPGRPID	Group ID	Char		Populate with the value from GRPID variable.																																																																		
006		PPTESTCD	Parameter Short Name	Char		Populate with the first word from PARAM variable where '(' is the delimiter.																																																																		
007		PPTEST	Parameter Name	Char		Set to "Time of CMAX" when PPTESTCD="TMAX".																																																																		
						PPTESTCD="CMAX". Set to "AUC All" when PPTESTCD="AUCALL". Set to "Half-Life Lambda z" when PPTESTCD="LAMZHL". Set to "Vz Obs" when PPTESTCD="VZO".																																																																		
008		PPCAT	Parameter Category	Char		Populate with the second word from GRPID variable where '_' is the delimiter.																																																																		
009		PPORRES	Result or Finding in Original Units	Char		Populate with the value from RESULT variable.																																																																		
010		PPORRESU	Original Units	Char		Populate with the second word from PARAM variable where '(', ')' are the delimiters.																																																																		
011		PPSTRESC	Character Result/Finding in Std Format	Char	Populate with the value from PPORRES variable																																																																			
012		PPSTRESN	Numeric Result/Finding in Standard Units	Num	Convert PPSTRESC to numeric value where applicable.																																																																			
013		PPSTRESU	Standard Units	Char	Populate with the value from PPORRESU variable																																																																			
014		PPSPEC	Specimen Material Type	Char		Populate with the value from SPEC variable.																																																																		
015		PPRFTDTC	Date/Time of Reference Point	Char		Populate using PCON dataset. Merge PPARAM and PCON datasets at subject and GRPID variables level and fetch DOSING_TIME from PCON as PPRFTDTC. Notes: 1) Use only first word from GRPID variable of PPARAM dataset. 2) Multiple records exist in PCON for each SUBJECT and GRPID - first record can be used as DOSING_TIME is expected to be same on all records of a GRPID.
