ROWORDER	SUPP	VARIABLE_NAME	VARIABLE_LABEL	TYPE	GENERAL_COMMENT	FORM_RESP
001		STUDYID	Study Identifier	Char	Populate as 'MYCSG'	
002		DOMAIN	Domain Abbreviation	Char	Populate as 'RE'	
003		USUBJID	Unique Subject Identifier	Char	Concatenate the value of STUDYID variable to SUBJECT variable with a hyphen in between.	
004		RESEQ	Sequence Number	Num	Sort the records by USUBJID, RETESTCD, REDTC and set to 1 on the first record for each subject, and increment by 1 for each subsequent record within the subject	
005		RETESTCD	Short Name of Respiratory Test	Char		The responses to each question item is collected in a separate variable. We need to transform the data such that we create a row for each question Create a record with RETESTCD=FEV1 to store the result from FEV1. Create a record with RETESTCD=FVC to store the result from FVC. Create a record with RETESTCD=FEV1PP

						from FEV1PP. Create a record with RETESTCD=FVCP to store the result from FVCP.
006		RETEST	Name of Respiratory Test	Char		Populate as 'Forced Expiratory Volume in 1 Second' when RETESTCD=FEV1. Populate as 'Forced Vital Capacity' when RETESTCD=FVC. Populate as 'Percent Predicted FEV1' when RETESTCD=FEV1PP. Populate as 'Percent Predicted Forced Vital Capacity' when RETESTCD=FVCP.
007		REORRES	Result or Finding in Original Units	Char		Populate using FEV1 when creating row for RETESTCD=FEV1. Populate using FVC when creating row for RETESTCD=FVC. Populate using FEV1PP when creating row for RETESTCD=FEV1PP. Populate using FVCP when creating row for RETESTCD=FVCP.

						RETESTCD=FEV1. Populate as "L" for RETESTCD=FVC. Populate as "%" for RETESTCD=FEV1PP. Populate as "%" RETESTCD=FVCP.
009		RESTRESC	Character Result/Finding in Std Format	Char	Populate with the values from REORRES	
010		RESTRESN	Numeric Result/Finding in Standard Units	Num	Convert RE.RESTRESC values to numeric where applicable.	
011		RESTRESU	Standard Units	Char	Populate with the values from REORRESU	
012		REOBXFL	Last Observation Before Exposure Flag	Char	Populate as "Y" on the latest record on or before RFXSTDTC per RETESTCD within a subject.	
013		VISITNUM	Visit Number	Num		Populate with the value from FOLDERSEQ
014		VISIT	Visit Name	Char		Populate with the value from FOLDERNAME
015		REDTC	Date/Time of Collection	Char		Populate using REDAT_RAW after converting to ISO8601 format.
016		REDY	Study Day of Visit/Collection/Exam	Num	Populate using RE.REDDTC and DM.RFSTDTC. If REDTC is on or after REDTC then populate
