| 001        |                  | Toxicity CTCAE term | Activated partial thromboplastin time prolonged                                                                                                                                                                                                                                                                    |
| 002        |                  | Toxicity direction  | HIGH                                                                                                                                                                                                                                                                                                               |
| 003        |                  | Event description   | A finding based on laboratory test results in which the partial thromboplastin time is found to be greater than the control value. As a possible indicator of coagulopathy, a prolonged partial thromboplastin time (PTT) may occur in a variety of diseases and disorders, both primary and related to treatment. |
| 004        |                  | Grade 1             | >ULN - 1.5 x ULN                                                                                                                                                                                                                                                                                                   |
| 005        |                  | Grade 2             | >1.5 - 2.5 x ULN                                                                                                                                                                                                                                                                                                   |
