001	VISITNUM	Visit Number	1. Collected values of Visit number and Visit are present in FOLDERSEQ and FOLDERNAME variables respectively in raw dataset. 2. Each collected visit number and visit value need to be remapped to standard notation. 3. The mappings are available in VISIT_MAPPING dataset, COLLECTED_VISITNUM corresponds to FOLDERSEQ, COLLECTED_VISIT corresponds to FOLDERNAME. 4. VISITNUM, VISIT and VISITDY in VISIT_MAPPING correspond to the standard mapping. 5. Fetch VISITNUM, VISIT and VISITDY into the raw dataset(RAWDATA) of interest by joining it with VISIT_MAPPING(VM) dataset at VM.COLLECTED_VISITNUM=RAWDATA.FOLDERSEQ and VM.COLLECTED_VISIT=RAWDATA.FOLDERNAME level.
002	VISIT	Visit	Populated with the values from VISIT column of VISIT_MAPPING dataset. See the derivation logic for VISIT variable for details.
